MAGMA

COLLECTION

MAGMA, where molten earth becomes luminous design.

Inspired by the fluid power of molten earth, the **Magma Collection** transforms raw energy into sculptural lighting with a bold artistic presence. Crafted in **solid brass** and shaped through organic, irregular forms, each piece evokes metal in motion, frozen at its most intense moment.

Balanced with sleek glass elements and warm illumination, Magma embodies a striking contrast between refinement and primal force, bringing depth, texture, and contemporary elegance into any space.

MAGMA

WALL LIGHT

Inspired by the **raw movement of molten earth**, the Magma Wall Light is a sculptural lighting piece crafted entirely from **solid brass**. Its organic form captures the essence of flowing magma frozen in motion, celebrating natural irregularity and artisanal craftsmanship. The textured surface reflects warm highlights that shift with the viewer's perspective, while the glow it emits creates a soft ambient atmosphere and a refined interplay of light and shadow across the wall.

Available in **four different sizes** and sold individually, the pieces can be combined to create a dynamic composition, like molten material flowing organically across the surface, bringing warmth, depth, and artistic expression to contemporary residential and hospitality interiors.

MAGMA

SUSPENSION

Inspired by the **raw beauty of molten earth**, the **Magma Suspension** captures the moment where liquid metal meets light. Sculptural brass forms flow organically around sleek glass tubes, evoking magma in motion, powerful, fluid, and visually captivating. The warm illumination emitted through the glass contrasts beautifully with the richly textured brass exterior, creating a dramatic balance between sophistication and elemental energy.

Designed as a statement piece, the Magma Suspension transforms lighting into art, infusing interiors with warmth, intensity, and natural elegance, ideal for dining areas, living spaces, and architectural environments.
