THE ART OF BRASS

Presented at Salone del Mobile, Castro Lighting unveils a new chapter: The Art of Brass. A tribute to material excellence, artisanal mastery, and timeless design, this collection explores brass as both substance and expression. Each piece is shaped by hand, where tradition meets innovation, and raw material is transformed into sculptural light and refined forms.

In this vision, every creation carries intention. Every surface tells a story. And every detail honours the art behind its making.

MAGMA

SUSPENSION

Inspired by the raw power of molten earth, the **Magma Suspension** is a sculptural composition where solid brass and glass converge in a dynamic expression of nature. Presented for the first time at **Salone del Mobile**, its irregular forms evoke fragments of magma suspended in motion, capturing a moment where fluidity meets permanence.

Each element is meticulously handcrafted in Portugal, revealing textured brass surfaces paired with delicate glass inserts that appear to flow within the structure. This interplay between metal and glass enhances the sense of depth and movement, as if molten matter has been frozen mid-transformation.

When illuminated, the glass diffuses a warm, ambient glow, softening the rugged character of the brass and creating a refined dialogue between light and shadow. Organic, expressive, and deeply tactile, the **Magma Suspension** transcends function, becoming a statement of material contrast, artisanal mastery, and nature-inspired design.

MAGMA

SUSPENSION

Inspired by molten earth, Magma Suspension captures the moment where liquid metal meets light. Sculptural brass flows around sleek glass tubes, evoking movement, heat, and raw energy.

Warm illumination contrasts with textured brass, creating a bold yet refined presence. Designed as a statement piece, Magma transforms light into art, bringing warmth and natural elegance to contemporary interiors.

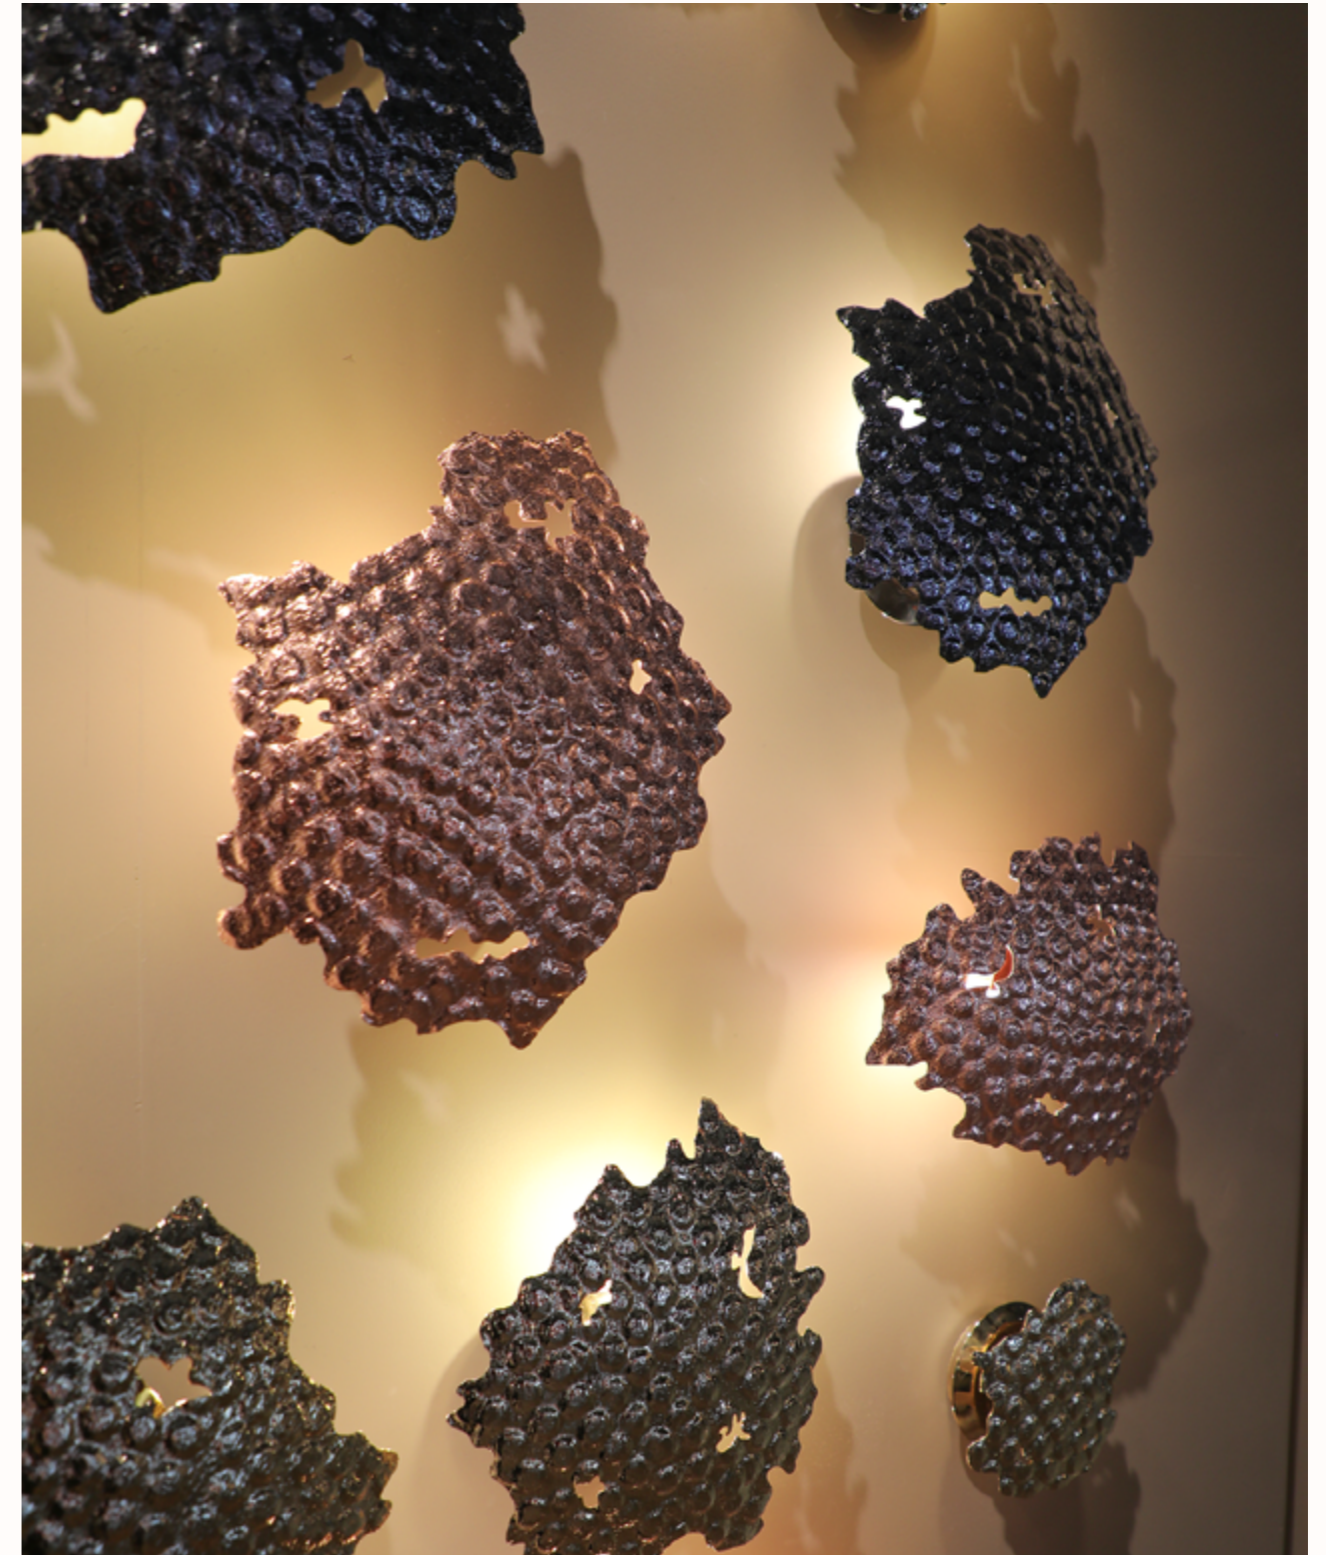

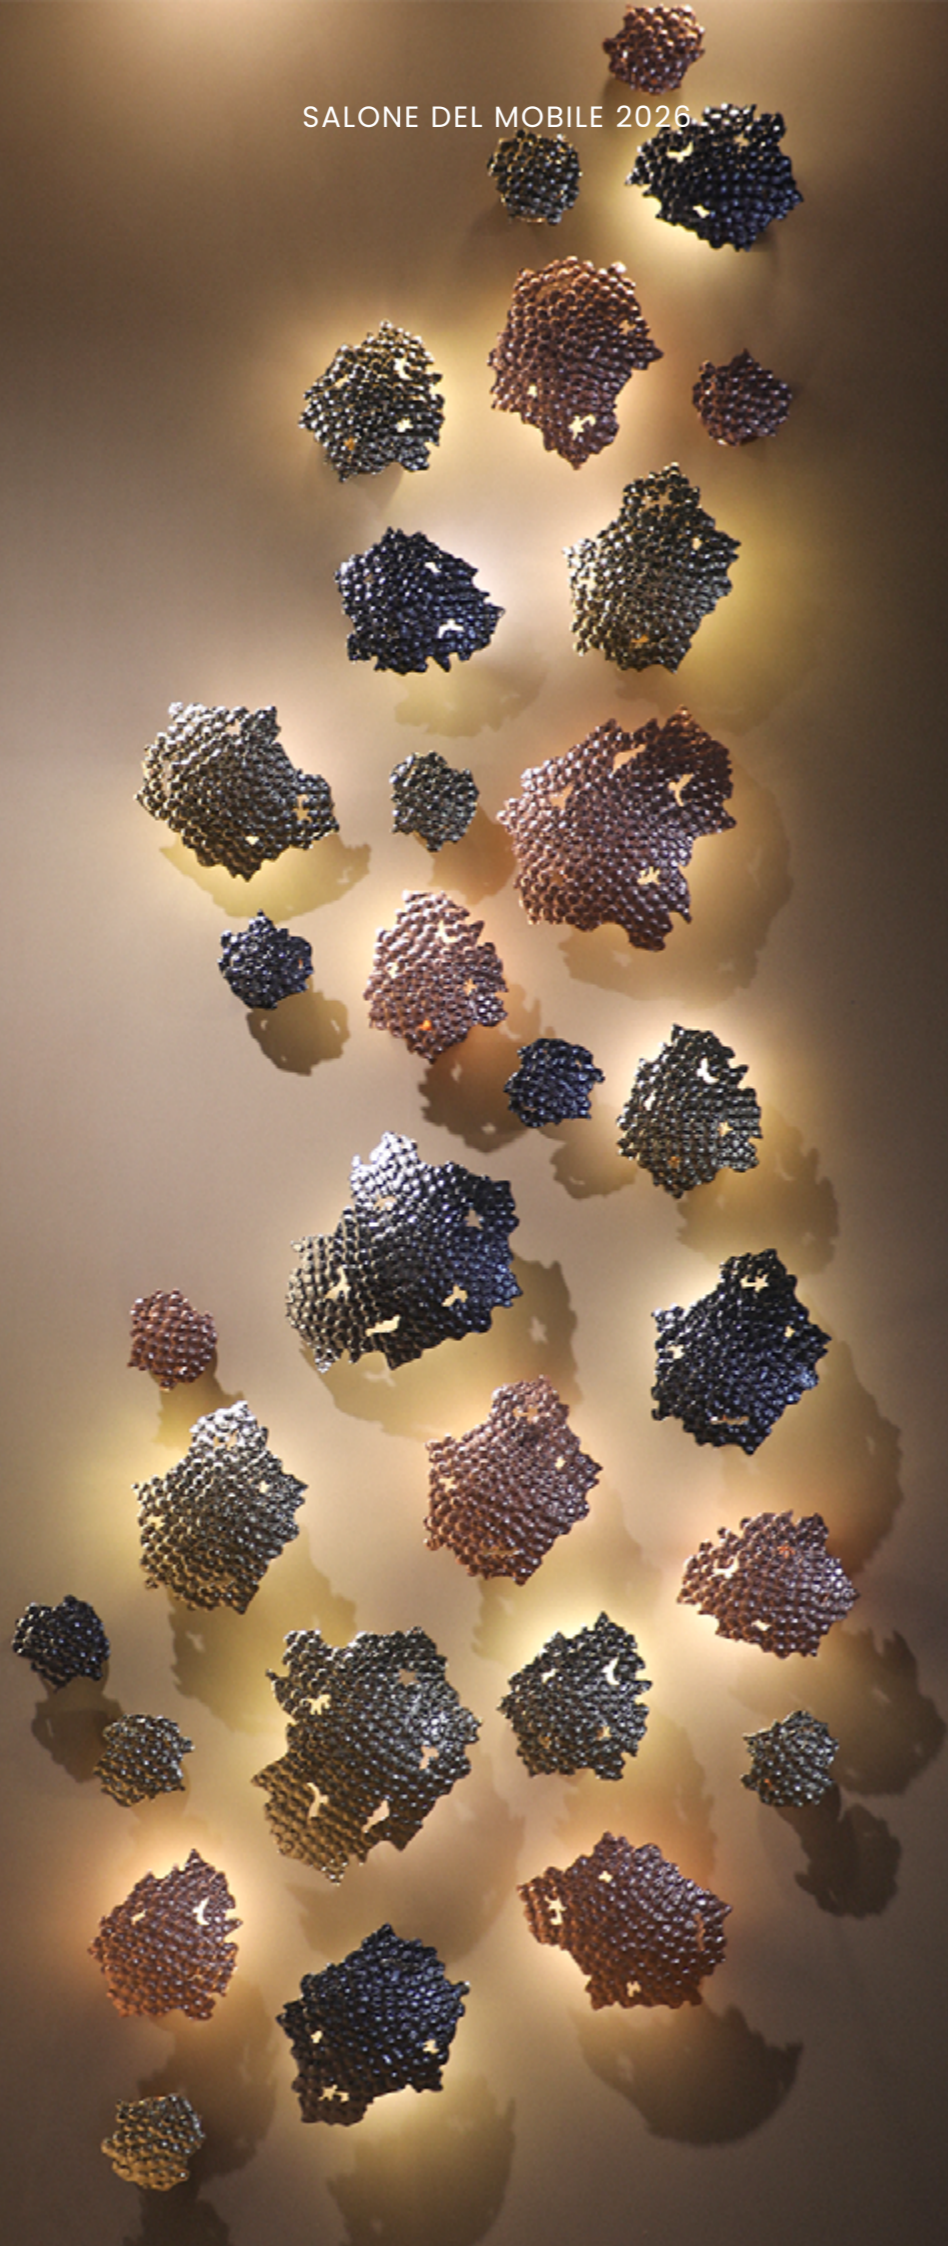

MAGMA

WALL LIGHT

Inspired by the raw movement of molten earth, the Magma Wall Light is a sculptural piece crafted from solid brass. Its organic, fluid form captures the essence of flowing magma frozen in motion, celebrating natural irregularity and artisanal craftsmanship.

The textured brass surface reflects warm highlights that shift with the viewer's perspective. When illuminated, it casts a soft, ambient glow, creating a refined interplay of light and shadow.

The design allows for a versatile presence, whether showcased as a singular statement or arranged in composition to create a dynamic wall installation. Each piece carries subtle variations, reinforcing its unique character and the authenticity of handcrafted brass. This balance between individuality and cohesion makes Magma an expressive element within curated interior narratives.

FLOW

SUSPENSION

The **Flow Suspension** is a sculptural lighting piece defined by fluidity and movement. Inspired by a bespoke vision, its soft curves unfold like waves, creating a sense of motion suspended in space.

Fully customisable in scale and configuration, it adapts seamlessly to each interior. When illuminated, it casts a refined glow that enhances its flowing form.

DESIGNING A LEGACY
SINCE 1978

Elegant and expressive, the **Flow Suspension** is a contemporary statement of freedom and design.

TERRA

SUSPENSION

Inspired by the Roman goddess of nature, the **Terra Suspension** is a bespoke lighting piece that celebrates organic beauty through a unique, tailored composition. Each version is thoughtfully designed to respond to its space, creating a one-of-a-kind sculptural presence.

Handcrafted in gold-plated and nickel brass, delicate leaves unfold with natural movement, revealing intricate textures that echo the fragility and rhythm of nature. The composition flows with lightness, as if shaped by wind and growth.

When illuminated, it emits a warm, refined glow, enhancing its organic forms. Elegant and expressive, the **Terra Suspension** is a timeless tribute to craftsmanship and nature-inspired design.

STALA

LINEAR

Inspired by the natural beauty of stalactites, the **Stala Linear** reinterprets the original Stala Suspension into a refined, elongated composition. Presented for the first time at **Salone del Mobile**, this new version introduces a sense of rhythm and architectural balance.

Handcrafted from brass and crystal, the piece also features fully brass elements that resemble stalactites, adding depth and material richness to the composition. Suspended in a harmonious alignment, the elements create a cascading effect, forming a continuous sculptural presence.

Its canopy can be customised in any shape or dimension, offering limitless possibilities for architects and interior designers. Whether used across ceilings, walls, or as a light-filled divider, it transforms spaces with fluidity and elegance.

When illuminated, the crystal diffuses a soft, sophisticated glow, enhanced by the warmth of brass. Expressive and timeless, the **Stala Linear** is a statement of craftsmanship, versatility, and nature-inspired design.

MAGMA

MIRROR

Inspired by the raw beauty of molten earth, the **Magma Mirror** captures the moment when liquid metal takes shape. Presented for the first time at **Salone del Mobile**, sculptural brass details flow organically around the frame, evoking magma in motion—fluid, powerful, and expressive.

Handcrafted in Portugal, the textured brass contrasts with the clarity of the reflective surface, while integrated lighting enhances its sculptural presence. Subtle illumination filters through the layered metal, creating a warm, ambient glow that highlights the depth, irregularity, and richness of the material.

The interplay between light and shadow brings the piece to life, adding movement and atmosphere to the surrounding space. Both functional and artistic, the **Magma Mirror** transforms interiors with warmth, texture, and a luminous, sculptural identity.

MAGMA

DINING TABLE

Inspired by the raw beauty and movement of molten earth, the **Magma Dining Table** transforms natural force into a sculptural centrepiece. Presented for the first time at **Salone del Mobile**, its base reveals an organic composition where textured brass elements emerge like fragments of magma, flowing and solidifying around the structure.

Handcrafted in Portugal, the piece balances a strong architectural presence with fluid, expressive details. The sculptural base contrasts with the smooth tabletop, creating a refined dialogue between irregularity and precision, strength and elegance.

The molten-inspired brass forms introduce depth, texture, and movement, giving the table a dynamic yet harmonious identity. Both functional and artistic, the **Magma Dining Table** brings warmth, character, and a bold sculptural presence to sophisticated interiors.

HARP

SLIM CHAIR

Inspired by the harmony of the harp, the Harp Collection transforms rhythm and elegance into sculptural dining pieces. Featuring a refined table with a gold-plated brass base and a sleek, versatile chair, the collection blends architectural strength with visual lightness, bringing timeless sophistication to modern interiors.
